

Pur Urban Reiki

The evolution of healing

Who we are:

We are a young urban team of Jikiden Reiki Practitioners who work with clients from a central location in Toronto. Our clients range from professional athletes, to children. We also work with individuals who have complex and challenging health histories. Our reiki practitioners have a background in nursing, yoga and professional sport.

Our mission is to help bring Reiki to the forefront of alternative medicine, providing to the people a safe and natural alternative form of healing.

We are passionate about what we do, and dedicate ourselves to this practice, living our lives according to the five reiki principles as well as other spiritual practices and studies.

We are also teachers and ritual masters with the Modern Mystery School and on a regular basis we switch our hats to teach classes in sacred geometry, astral travel and channelling. We also practice other healing modalities that have been handed down through the lineage of King Salomon.

What we do:

There are a number of different ways that we work with our clients. Clients either travel to us, or on a case by case basis, we travel to our clients, or provide distance treatments.

Treatments are usually 45mins - 1hr in length. Apart from our regular treatments we also provide speciality reiki services. For more details on these speciality services please visit our website at: www.pururbanreiki.com or email us at: info@pururbanreiki.com

- Reiki for Athletes
- Reiki for Palliative and End of Life Care
